THE DESIGNING AND DRAFTING OF ACCOUNTING SYSTEM FOR AGATHA SHOP

Cindy Feliana
NPM: 1642056

ABSTRACT

The implementation of this practical work aims to assist Agatha Shop in recording accounting using a computer-based system so it is more efficient and effective in financial records. Agatha Shop is a UMKM engaged in online sales of fashion bags located at Ruko Nagoya Gateway No. 14. This practical work is running for 6 months, from July 2019 to December 2019 and process of reports about 1 month till 30 January 2020.

Agatha Shop which is the client in practical work wants an accounting system that is simple and easy to understand. The design of this accounting system is made using Microsoft Access and the design is adjusted to the needs and desires of the client so the results are in line with client expectations.

The positive changes in the implementation of the accounting system for several months have been felt by Agatha Shop because process of inputting transactions is easier to do and financial reports are automatically created. The financial statements generated by this accounting recording system can assist clients in making decisions so that the results are useful for the long term.
