ACCOUNTING INFORMATION SYSTEM APPLICATION DESIGN ON AYU LAUNDRY

LENI MUSTIKA
NPM: 1642012

ABSTRACT

The purpose of this work practice to compile and design a program or recording system of financial statements that has quality and is expected to make it easier for business owners to arrange the latest financial management and operational activities that have occurred at Ayu Laundry. The methods used in this research include the observation and interview stages, the results obtained through this process will be used as a guide in the formation of practical work reports as an impact of financial reporting.

The financial reporting form the system by using Microsoft Access which has adjusted the interests of laundry which will be a tool for reviewing mechanism. Practical work builds a group of journals, namely general journals, sales, purchases, cash disbursements, cash receipts, salary payments, ledgers, balance sheets, income statements, statements of financial position, sales reports and purchase reports. This program has been implemented well by Ayu Laundy. which fertilizes a quality financial statement

Keywords: Accounting system, financial statements, practical work.
