ANDI

Abstract

The author conducts a study entitled the application of the presumption of innocence principle in the process of investigating information technology crime (cyber crime) in the regional police riau island, where in this case every person suspected, arrested, detained, prosecuted, and / or presented before a court, must be considered not guilty until a court ruling declares his guilt and obtains a permanent law. Everyone has rights that must be protected and must be treated well, and fairly.

The research method conducted by the author is empirical juridical. The author carries out data collection techniques by interviewing. After doing the data collection techniques, the writer will do the analysis to solve the problems that are in accordance with the formulation of the author's problem.

The results of the research that the authors have concluded are where people have rights that must be protected, treated well and should not be discriminated against, and for the general public to be more careful in using social media or taking action, so as not to cause words or the consequences of which can be snared by law or violating regulations set forth in legislation, because the police can patrol through social media.

Key words: The Application of The Presumption of Innocence Principle, Investigation Process, Cyber Crime.
