Lack of awareness of the remote island island around the city of Batam that causes not many people who know of the existence and potential owned by the island. One example is Petong island, the island is located across the city of Batam has a potential in the field of tourism, with the documentary in the form of a documentary is expected to be one way to be able to introduce the tourist attraction tersebuh. This documentary uses the application of Multimedia Development Life Cycle method, utilizing Adobe Premiere CC and Adobe Audition CS6 software for designing documentary film about Pulau Petong. The design of a documentary film about Pulau Petong with the application of Multimedia Development Life Cycle method resulted in a more focused and more structured documentary work in video designing in the documentary.
