This thesis aims at preparation on PT Tri Surya Mandiri web-based software that can assist in the assessment of performance at PT Tri Surya Mandiri and payroll employees. This thesis is done on October 27, 2017 until December 15, 2017. The method used is the method of interviewing and application. This method creates a web-based decision support system with AHP (Hierarchy Analysis Method). This design is useful for companies such as performance and payroll staffing. Thus, it can shorten the time in evaluating employee performance and salary. This app is designed in PHP, Javascript, HTML and CSS for application development. To facilitate the process of designing the author using bootstrap as a css framework.

Keywords: Web, PHP, JavaScript, HTML, CSS, MYSQL.
