Education is a conscious and planned effort in realizing the character and civilization of a nation that is dignified and responsible, as a supporter of the ideals of the nation and state, namely to educate the Indonesian generation, so an institution is formed in the field of education called school. Schools are divided into several levels including elementary schools, junior high schools, high schools to universities. In addition to educating the nation's life, the formation of polite and polite character is also an important element that students must accept in school by educators. The issue of violence still occurs frequently in the school environment. The acts of violence are not only felt by students but also felt by educators as teachers. Violent actions that can be accepted by students and educators can be in the form of physical or verbal violence, in addition to disciplinary efforts, the teacher is sometimes afraid to give punishment or reprimand as a result of consideration of Law No. 35 of 2014 as a change to Law No. 23 of 2002 about child protection. many cases occur related to the abuse carried out by students to educators in this era which makes educators anxious in enforcing disciplinary actions for students to improve their character and behavior

The author carries out empirical research in practical work activities at State Senior High School 12 Batam, where the author will examine whether the implementation of protection from all aspects of violence against teachers and students has been done well or not, then from the results of this practical work the author designed several outputs later can minimize acts of violence occurring in the school environment, with the aim of reaching a culture of peaceful anti-violence schools.
