ABSTRACT

DESIGN AND IMPLEMENTATION OF WEB BASED DOCUMENT MANAGEMENT APPLICATION WITH SCRUM METHODS IN UNIVERSITAS INTERNASIONAL BATAM

NPM : 1531114
ANDI WIJAYA

In an institution or company, document archiving becomes an important task that must be done. Document archiving is often a problem for large institution or company. The purpose of this research is to overcome this problem by designing a web-based document management application with the scrum method.

The development and design of this application used laravel framework with scrum development method. This application will be implemented at the Universitas International Batam to assists UIB operations.

This application helps the staff task of document archiving by using electronic archiving. The documents will be stored electronically so that it will make it easier for staff to search again and also deal with the risk of loss or broken of document.

Keywords : document, scrum, laravel, electronic archiving
