EXECUTIVE SUMMARY

DESIGN AND DEVELOP ACCOUNTING SYSTEMS IN CASH & CARRY FURNITURE STORE

YANTI
NPM: 1542034

The purpose of this internship research is to assist Cash & Carry Furniture Store's in solving the problems that they are facing in carrying out accounting records and reporting due to they do not have an adequate accounting system. This research activity was carried out during the period 01 June 2018 to31 October 2018. Some methods had been used in the information or data collection in this research e.g. surveys, observations, interviews, designation, and system implementation.

This internship research produces an accounting system based on Microsoft Office Access that can be used by the company. Financial reports that can be generated by the system including balance sheet and income statement.

The outcome of this internship research shows that there's value added in Cash & Carry Furniture Store after the designed system is implemented well. The generated financial statements are reliable and accurate. The resulting report is expected to be one of the factors in company performance analysis.
