Abstract

The implementation of this research was to find out how the judicial legal reasoning in making decisions against perpetrators of criminal offenses and what are the legal considerations of the judges of the Batam District Court and judges at the Cassation Level in prosecuting perpetrators of murder crimes.

This research was conducted by researchers using the normative juridical research method. This research is the main approach, namely revealing normative rules and legal principles which are policies in formulating criminal acts of murder related to the laws of criminal law in Indonesia and methods of data analysis. used in this study is to use qualitative analysis, namely by explaining and explaining the data in the form of sentences arranged with the subject, objectives and concepts related to it systematically, then carried out discussion and analysis of the conclusions in response to the subject matter presented in the

Based on the results of this study, it can be concluded that there are differences in judges' judgments at the level of the District Court and the Supreme Court in deciding a criminal case. At the District Court Level the facts of the court are more closely related to the judge's conviction and override justice. While at the Cassation Level the Supreme Court uses a sense of justice to decide a case accompanied by examining the file by the applicant to file an appeal.
