*The purpose of this thesis research is to analyze the extent of the application of the Republic of Indonesia Minister of Trade Regulation Number 16 of 2018 in Batam City and to determine the impact of the application of the Republic of Indonesia Minister of Trade Regulation Number 16 Year 2018 in Batam City.*

*Research methods applied by researchers are Empirical Juridical Legal Research, this type of research intends to obtain information in the form of knowledge about legal relations with conditions that occur in the community together with elements that influence the implementation or enforcement of these laws within the community.*

*The conclusion obtained by the researchers in this study is that in the effort to implement the Garlic import quota policy according to the Republic of Indonesia Minister of Trade Regulation Number 16 Year 2018 in Batam City has been effective in accordance with the law where PT Frozen King Mulia has pocketed 2 (two) times issuance of Import Approval from the Ministry of Trade in 2018. In the event of delay in the issuance of Import Approval, it can affect the price of garlic in Batam City because the majority of garlic in Batam City is an imported product. Even with the mandatory planting policy, importers must spend a large amount of funds to carry out the mandatory planting, but with mandatory planting it is proven to reduce the level of imports in Indonesia in 2018.*

*Keywords : Garlic, Mandatory planting, Import*
