

VIDEO 2D ANIMATION ANTIBULLYING DESIGN BY USING ADOBE FLASH

ABSTRACT

NPM: 1331037

Kelvianto

One of the pathological symptoms that often occurs in social communities, especially among teenagers, is bullying. Bullying can cause harm to both parties both mentally and psychologically. In the increasingly sophisticated digital era, media such as articles, images and videos allow people to interact more quickly and effectively. By utilizing anti-bullying animation videos to reduce the possibility of bullying among the community. The purpose of designing this animation video is to add knowledge and development related to bullying that occurs in the community, especially Indonesian teenagers. The applications used in making video animations are Adobe Flash, Adobe Illustrator, and Adobe Premiere Pro

Key Words: Anti Bullying, 2D Video Animation, Adobe Flash, Adobe Illustrator, Adobe Premiere Pro
