SURYANTI

*Abstract*

*The purpose of this research is to determine the effect of ownership structure, corporate governance and debt maturity on performance of companies in Indonesia Stock Exchange. The independent variables used in this research are government ownership, institutional ownership, family ownership, foreign ownership, managerial ownership, concentrated ownership, board structure, board size, independent board of directors, board meeting, board committee, remuneration, long term debt, short term debt, total debt, firm size, firm age, assets tangibility and growth opportunities.*

*This research uses a data sample of 419 companies listed on the Indonesia Stock Exchange from 2013 to 2017 so that the total data that can be tested is 2.095 data. The site [www.idx.co.id](http://www.idx.co.id) is a source for writer to get the company's annual report in completing the data. Panel regression analysis with the best fixed effect model is the method used in this study.*

*Result obtained from this research are foreign ownership, board structure, long term debt ratio, short term debt ratio and firm age have a significant impact to firm performance, while government ownership, institutional ownership, family ownership, managerial ownership, concentrated ownership, board size, independent board of directors, board meeting, board committee, remuneration, firm size, assets tangibility and growth opportunities have not significant impact to firm performance.*

***Keywords:*** *firm performance, ownership structure and board*
