

EXECUTIVE SUMMARY

SHEET PILE METHODOLOGY OF PT KARIMUN ANUGRAH

SEJATI SLIPWAY DEVELOPMENT PROJECT

SINGGIH PANGESTU WIDDYANTO

NPM: 1511020

This practical work aims to determine the method of construction implementation at the PT Karimun Anugrah Sejati Slipway Construction Project and analyze the structure of the column being worked on. Practical work is carried out for 3 months from March 2018 to June 2018 by direct observation of the location of the construction work.

This practical work provides benefits to the author in the form of real work experience and recognizes the system and method of implementation carried out on the project. The things learned are in the form of work procedures, steps in building a construction, so that control is carried out during the development process.

The methodology results for sheet pile by the author based on the work in the field of work tools used are very sufficient.

Keywords: methodology, tools.
