

EXECUTIVE SUMMARY

**ANALYSIS OF STRUCTURES IN
GRAND BATAM MALL DEVELOPMENT**

TRESNI AYU ROSVITA
NPM : 1411024

Development is an activity that has been agreed upon by two parties in the form of services to build a building such as residential buildings, shopping centers and other supporting buildings. Development consists of upper structure and lower structure. One of the lower structures is Tiebeam, Tiebeam is a sloof which functions as a binding link between one foundation and another foundation,

This analysis uses data obtained through practical work at Grand Batam Mall - PT. Rejeki Putra Riau for three months from February 2017 to May 2017.

Keywords: Tie Beam, Structure, Development
