### **ABSTRACT**

*This internship takes place in FJ COM DC Mall Batam which is one of thousands small medium enterprises in the city. Over the years FJ COM has been facing some difficulties since its maiden operation, one of the main problem was the unavailability of a reliably accounting recording system to provide an accurate financial reports that reflects the entity's actual financial situation because its daily financial transactions were recorded manually inaccurately. Financial reports take a crucial part of decision making for the entity in further expansion, hence an accounting recording information system is needed. This internship starts from July 31<sup>st</sup> 2019 till 29<sup>th</sup> November 2019 after the process of stimulate approach by observating, interviewing and designing the system.*

*The output of this internship is an user friendly accounting system that provides accounting recording and financial reports automatically based on what FJ COM needs. The user friendly design was made with the purpose to maximize user experience of using the system fatures such as forms that will be filled during the accounting recording process that will automatically generate and produce entity's financial reports.*

*After the implementation of the accounting system, the entity can feel the positive impact from it such as giving convenient to the user for recording the transactions that used to be time consuming before which now can be done effectively and efficiently. Besides recording the transaction became more effective and efficient. The entity now can find out the number of inventory in real time and controlling the inventory is becoming easier than before.*
