

EXECUTIVE SUMMARY

ANALYSIS OF PROJECT QUALITY USING OBSERVATION METHOD (STUDY CASE : THE PROJECT OF PURI KHAYANGAN RESIDENCE APARTMENT CONSTRUCTION BATAM CITY)

ANGGA RISKY
NPM : 1611015

This internship program aims to control the quality of a project in the Puri Khayangan Residence Apartment project. Internship program activities carried out within three (3) months from February 11, 2019 until May 11, 2019. The methods of intership program applied in the implementation were the observation, interview and descriptive methods.

By doing the internship, the author can gain experience and new knowledge about the methods and systems of implementation carried out on construction projects. During internship program, the author can find out how to carry out the work, stages of structural development, and treatment methods.

Based on the results of the report that has been carried out by the author, the quality of the project in the Puri Khayangan Apartment Project is quite good because the quality is above the planned standard. And the quality that is maintained is still tested according to the standard.

Keywords: project, quality, test.
