

**TIME SCHEDULE ANALYTIC OF
WINNER FLOWER HOUSE
ABSTRACT**

Edrick Ottoh Wijaya
NPM: 1611026

This practical work aims to provide students with knowledge of the world of construction, because there are differences between field practice and theories learned during lectures. Practical work is also a mandatory task for students in completing the Undergraduate (S-1) level of the Civil Engineering Study Program, Faculty of Civil Engineering and Planning, Batam International University.

The Winner Flower House housing development project developed by PT. Winner Nusantara Jaya as a developer. Winner Flower House will be used as a residence, shop house and apartment, and has facilities such as a club house and swimming pool.

I, as the executor of the practical work, will discuss the time schedule in this development process, starting from development planning to development. Contains network planning, bar charts and s curves in accordance with applicable regulations in Indonesia.

Keywords: time schedule, network planning, bar chart, s curve
