This project is carried out at the Wines & Spirits Cafe aims to help clients to overcome problems in recording stocks data and sales data that is still using a manual system. Wines & Spirits Cafe requires a sales information system to overcome the problem in recording data. The author designed a web-based sales information system that is useful to facilitate Wines & Spirits Cafe in recording inventory data and sales data. The system is designed using the PHP programming language and uses MySQL as a database. The system designed has been used by clients so recording stocks data and sales data is more systematic.

Keywords: web, php, MySQL, Sales Information System
