

## EXECUTIVE SUMMARY

### DEVELOPMENT OF THE STORAGE RECORDING SYSTEM IN THE

### GAS STORAGE

Felisia Intan Ceria

NPM: 1541369

Practical work report that contains the way the author overcomes the problem occurred at the base of the gas store in terms of recording inventory.

Activities of this practice during period of July 2018 until October 2018. There are several steps taken by work activities this practice is field observation,

interviewing the owner of the company, making the system renewal.

Practical work activities that produce a system of recording inventory a companies can be shown to be owned by the company price that knows the condition of the company.

The system for recording inventory used is the Microsoft Excel program 2010 with the use of modern systems can be very easy to find stock inventory goods at the company. Companies do simple systems to make it easier find out financial statements. This is a problem that is being faced by the owner the shop.
