ABSTRACT

PERANCANGAN DAN IMPLEMENTASI SISTEM MANAJEMEN SERTIFIKAT DI BIRO HUMAS UNIVERSITAS INTERNASIONAL BATAM

Rina Susanty
NPM : 1631106

This practical work has the objectives to design a website-based software that can help the Universitas Internasional Batam Public Relations Bureau in carrying out the process of taking certificates of activities that are still carried out manually. In carrying out the project design process using the programming language PHP, HTML, Javascript as well as the help of the bootstrap framework and using the Visual Studio Code editor.

The result of this practical work is a system that can be used in the process of taking certificates and recapitulating data from Universitas Internasional Batam activities.

Keyword : system, certificate, php, web, bootstrap
