

EXECUTIVE SUMMARY

DESIGN OF ACCOUNTING RECORDING SYSTEM FOR PAPA LAUNDRY

Christina Kwok
NPM : 1542128

The purpose of implementing this field study is to design a system of accounting that can help business owners to know the financial conditions accurately and precisely. The design of the accounting record system is using the Microsoft Office Access 2010 as tools.

This field study research method is using observation and interview in preparing the report. In addition, the system of preparing financial statements is designed following in practical work includes account lists, purchase transactions, sales transactions, general ledger reports, income statements and others.

The object chosen in this design of accounting recording system is Papa Laundry. The system designed has been well implemented by Papa Laundry so it can apply the financial reports results are appropriate and accurate. These could improve the development of owner's business in making right decisions.
