EXECUTIVE SUMMARY

DEVELOPMENT AND CREATION OF MONAS *LAUNDRY* ACCOUNTING SYSTEM

GREATY EUDORA HUTAPEA
NPM : 1542222

This practical work report is carried out which aims help by Monas Laundry. In the financial recording and reporting of Monas Laundry, which still uses manual method, which can result in the Monas Laundry accounting system being unable to produce financial reports. The accounting system designed by author expected be able to assist Monas Laundry owners in producing financial reports that are in accordance with Indonesian accounting standards make easier for Monas Laundry owners to make the right decisions.

Accounting recording system helped by Microsoft Office Access 2007 and will begin to be designed after author collects information about the financial statements of the Monas Laundry. After knowing the problems faced and also the operational system of the Monas Laundry, the author designed a system of accounting records and corrected the parts that were seen as lacking in the system, then the implementation process will be carried out.

After the accountingsystem is designed and implemented with design of accounting system that starts from designing tables, forms, queries, and transaction, Monas Laundry knows generated by accounting system and canprovide a clearer decision than before. The advice given to Monas Laundry is to use an accounting system continuously in order to increase work efficiency in making a correct and appropriate decision for Monas Laundry business owners.
