EXECUTIVE SUMMARY

DESIGN OF ACCOUNTING SYSTEM
AT KAWAII PET SHOP

EVIE KAMALA NGO
NPM: 1542054

As the world of technology develops, the accuracy of information is in the interests of an UMKM, where this information is part of the decision making for business continuity in the future. This is part of the problems being experienced by some UMKM. Therefore, the purpose of doing this practical work is to help UMKM as a solution to facilitate obtaining financial information with the establishment of a Microsoft Office Access-based accounting recording system.

Kawaii Pet Shop is one of the UMKM that is experiencing problems in getting information accurately. This is because the recording done is still applied manually. The lack of understanding of the accounting basis also made it difficult for Kawaii Pet Shop to find out the conditions that occurred in Kawaii Pet Shop.

With this practical work, Kawaii Pet Shop can get information about financial conditions that occur accurately where the system designed can be implemented according to the needs of Kawaii Pet Shop. This is evidenced by the ease of getting information about financial flows that occur in a certain period and how much inventory is still there. The results of the information presented, the owner can also carry out more effective internal controls to improve company performance.

Keywords: recording system, pet shop, report, accounting, microsoft access.
