

EXECUTIVE SUMMARY

DESIGN OF ACCOUNTING AND FINANCIAL REPORTING SYSTEMS IN PT. INDO RAYA ENGINEERING

Natasja Dwi Santri
NPM: 1542002

This project created and design for a recording and reporting accounting system at PT. Indo Raya Engineering that engaged in building construction and this company that one of Micro, Small and medium Entity (EMKM) that have been operating in Batam City for approximately 1 year.

Implementation of the system designed by students towards PT. Indo Raya Engineering aims to developed this business unit especially in the recording and reporting accounting system.

The results at the end of applying the system to PT. Indo Raya Engineering will produce accounting financial reports in accordance with the standards with existing regulations based on computerization with Microsoft Office Access 2010. It is expected that the results of the design system are more detailed and more accurate, making users are easy to understand their business is profitable or loss for making decision related to the continuity in its business.

Keywords: Information Accounting System.
