

EXECUTIVE SUMMARY

DESIGN, CREATE, AND APPLY ACCOUNTING SYSTEM IN RUMAH LAUNDRY

DECTY SUVENNY
NPM : 1642119

The purpose of this implementation is to help the problem that happen in “Rumah Laundry” is the bookkeeping are handled manually, both from cash receipt or cash disbursement, so we cannot know directly if the current business gain or loss. Resolve this problem by building a accounting database using Microsoft Office Access 2010.

With this Accounting System hopefully it can produce a reliable and quickly financial statement. During the job training, to obtain data such as company identity, operational activities, and the problem that happen through interview, observation, and documentation. Beside the project it produces according the “Rumah Laundry” business such as a list, sales, purchasing, general journal and financial statement.

This system are well implemented by “Rumah Laundry” user and helped the bookkeepers till producing the financial statement. From that on, the owner can make a right decision on his business.
