THE DESIGN AND MANAGEMENT OF FINANCIAL AND INVENTORY SYSTEM IN BATAM FIGHTER CLUB (BFC)

*Ori Raidiani
NPM: 1641098*

ABSTRACT

Practical work is carried out at Batam Fighter Club (BFC) starting from 16 September 2019 to 16 December 2019. BFC is located in Cahaya Garden, Ruko Town House block A4 No. 1, Kelurahan Sadai, Bengkong District, Batam. BFC has been established for a long time but, the financial statement on the BFC are still done manually. This is due to the inability of businesses to design and manage finances and unorganized inventory management.

BFC still uses manual or non-computerized methods to record expenses and income, without monthly reports on the achievement of the business for a month. In addition, the inventory system is unorganized which lead excess or shortages in stock.

To solve the problem, the writer wants to design and manage financial and inventory systems in the BFC business. During the period of practical work, the BFC effort has implemented a design by the author. This implementation has resulted in organized financial statements in journals and income statements that are often used, as well as the design of inventory systems with FIFO (First In First Out) method.

Key words: Financial Statements, Income Statements, Inventory FIFO Method
