### ***ABSTRACT***

*This practical work is carried out in the Maison de Glorie florist starting from September 20, 2019 until December 20, 2019. Maison de Glorie is located in Kezia housing block e no 2. The Maison de glorie florist who recently started a business does not yet have reliable financial reports and does not make financial reports every period. The records taken by the Maison de glorie florist only use manual reports at the time of the sale.*

*Maison de Glorie manually records financial statements so it takes a long time to find out the income for each period. In addition, the recording of financial statements that are not reliable can cause errors in the calculation of income and expenses. Difficulties in business development will also occur.*

*Based on the management of financial statements in the flower shop business Maison de Glorie. The system used in business is Microsoft Excel 2007. The results of this implementation are financial statements that are simpler and easier to understand by business owners, so that business owners can know the benefits and losses during the business.*
