## ***DESIGNING OF ACCOUNTING RECORDING SYSTEM ON DISNEystore ONLINESHOP***

**Jevina  
NPM: 1642021**

### ***ABSTRACT***

*The implementation of this research aims to help onlineshop disneystore overcoming the problems encountered in recording transactions and financial decisions due to the unavailability of an accounting recording system. The method used for data collection in this study is a survey, interview, system design and implementation that has been designed.*

*This study designed a accounting system based on Microsoft Office Access 2016 that is in accordance with applicable accounting standards. With the existence of a system, the company will easily find out the progress of its business performance.*

*In this study, online shop disneystore gets ease in recording financial transactions to produce an accurate financial report. Reports produced can be used as material for analysis of company performance.*

*Keywords: recording system, accounting, financial statements*
