

## **CHAPTER V CONCLUSION AND SUGGESTIONS**

### **5.1 Conclusion**

After finishing this project named “Creating a Color Grading Video Tutorial using Research & Development Method” a few conclusions can be drawn from this project, which are:

1. The problem of this research is to find out what kind of color gradings are mostly used in movies with achievements and how to replicate the color grading style using simple tools.
2. We used the research and development method to research the color grading styles used by movies with achievements, and then developing a tutorial video to teach people how to replicate the style.
3. The result of this project is a 6 minute tutorial video which was uploaded to YouTube and has collected over 59 views and 10 likes.
4. The outcome of this project based on viewer feedback gathered by interviewing is that the viewers gain knowledge of the usage of colors in movies and how to recreate those color styles.

### **5.2 Suggestions**

After finishing the project, we have a few suggestions for future researchers, which are:

1. We suggest that further development research on the topic of what kind of transitions and cuts that are used in movies and how to create them.

2. We suggest future researchers to expand on this topic using different methods.

3. We suggest several topics that can be researched inspired by this topic, which are: set design in movies, make up design in movies, and audio design in movies.
