ABSTRACT

People often watch many movies and some of them will be nominated into awards, one of them is Oscar. Aside from Best Picture Award, there is Best Cinematography Awards. The purpose of this project is to find out what kind of color grading are most commonly used in the movies that has won Oscar Best Cinematography and then how to achieve that same kind of look. The solution is to create a tutorial video that demonstrates how to achieve those looks step by step using Davinci Resolve. The tool used to record the clip that are needed is Sony A7III and the recorded tutorial video will also be edited in Davinci Resolve. The tutorial video than uploaded into YouTube and gain more than 80 views. Based on the data obtained from the viewer comments and likes, the tutorial succeeded to inform people about the color grading used in Oscar Best Cinematography movies.

Keywords: Color Grading, Tutorial Video, Oscar, Research and Development, Davinci Resolve.
