***TOUR AND TRAVEL DOCUMENTARY VIDEO DESIGN
IN SOUTH KOREA USING MDLC METHOD***

TRIPENA BR SIHALOHO

NPM: 1631078

ABSTRACT

Documentary video is one of the videos that can bring realistic elements or genuine situation to the user. Documentary video can be used as a communication medium for the broadcasting of tourist information. The purpose of this final project design is to give clarity to tourist attractions to facilitate Indonesian tourists who are interested in visiting South Korea. This video is also beneficial for people who are not able to go to South Korea, since they can experience the beauty of South Korea by watching this video. The research method used in this project is the MDLC method, and is edited by Adobe Premiere Pro CS6 software. The writer will upload this documentary video to Youtube social media. After first posting this video, received 119 viewers and 5 likes.
