

3. Quality of the digital phone that we have right now it's not the best out there on the market. With better newer phones of 2019-2020, taking picture will resulting a better quality, as well as newer smartphones have macro mode and portrait mode.

4. Color adjusting is also necessary to bring up the enjoyment of readers who are reading the photo book, software such as Adobe Lightroom. After color adjustment, brightness and contrast adjustment is also a key point here to improve readers on reading the photobook as well as visualizing on what they will expect when they arrive on spot.
