

EXECUTIVE SUMMARY

**THE DESIGN AND DEVELOPMENT
OF ACCOUNTING SYSTEM AT
BATIK YUNHASRA STORE**

NOVIA INDRIYANI
NPM : 1542050

This study has the intent and purpose of making a design system that is useful as a medium for accounting records needed by the place of business so that it can produce financial reports. At first Batik Yunhasra Store did not have a system in accounting records, only recorded manually so that financial statements were inaccurate. Practical work is carried out on June 7, 2018 - June 30, 2019. The methods used to carry out practical work are from surveys, interviews, observation, design, and implementation.

Microsoft Office Access 2010 is a computer-based program that is used as the basis for making systems in this study. The system design used produces output in the form of several menu displays that are connected to each other and function to produce financial reports. The system design has been carried out and implemented by the Batik Yunhasra Store.

Changes that occur in the Batik Yunhasra Store after the implementation of the accounting system is that the owner can present financial reports in detail and accurately. The system that has been designed can be used as a comparison for the company's operational activities in a certain period and is used as a basis in making decisions for future business.

Keyword : *accounting reports, accounting, financial system*
