NPM: 1642053**

ABSTRACT

This project had been done in a small and medium-sized enterprise located in Batam, Davines Salon. Davines provides hair cut and other hair care services furthermore sells hair beauty product such as pomade, hair dye, shampoo, treatment, etc. When carrying operation, Davines salon has problem in financial records because the salon did not use accounting system in recording transaction, but only used simple records system which is using paper as the recording media. Impact of this simple recording system cause the owner have difficulties in accessing financial information ang making decision for his business.

The purpose of this project is to help the enterprise to improve the quality of accounting information obtained by developing a computerized accounting recording system using Microsoft office acces 2016 application and facilitating entities in accessing and obtaining financial information that has been arranged in accordance to applicable regulations

Designed system was compiled in accordance to condition and needs of the Davines salon. Davines salon can operate the system well and also understand the flow of recording and able to provide financial report to assist owner in making decisions

Key word: accounting, information, system, record
